

What equipment is needed to play Water Polo?

In the first instance, swimming trunks or costume, water bottle and goggles (for the swim training elements). Most players purchase water polo costumes which are made of a heavier more durable fabric than that used by a competitive swimmer. Club costumes and trunks can be purchased via the website [here](#)

The club provides hats with ear guards to play matches and for use in training. Girls, particularly with long hair are encouraged to wear a swim cap under the water polo hat, of the same colour as the hat. Normally white for the home team, blue for the away team, and red for the goalie. These can be purchased from the club shop alongside any other Club kit

We encourage players to wear Club kit to any games- especially as we like to publicise our achievements, and it helps if they all wear Club kit
